

Although the UK is now in the process of removing COVID restrictions, precautions remain important for keeping the virus under control. *Falmouth Uncovered* has taken steps to ensure that our tours are safe and stress-free by implementing the following steps.

1. We will keep up to date with public health guidelines and will adhere to these for the duration of each tour.
2. We will maintain government-recommended social distancing between ourselves and clients at all times.
3. When guiding groups from different households, we will encourage groups to socially distance.
4. We will avoid shaking hands or any other physical contact with clients.
5. We will disinfect our hands before each tour, and will carry hand sanitizer with us.
6. If requested, we will consider wearing a mask.
7. We will use a voice amplifier to remove the need for raising our voices.
8. Our routes are planned to avoid busy streets.
9. Tours are limited to twenty people to prevent unnecessary congestion.

Please get in touch if you require any further details.
